

**IN THE SPECIFICATION**

Please replace the paragraph starting on page 7, line 27 to read as follows:

In the former case, the second sensing device 50 and/or the alarm light apparatus 60 are used together with the first sensing device 16. In the latter case, the second sensing device 50 and/or the alarm light apparatus 60 are used alone. Also, in the former case, a process in which the remote controller 34 is turned on/off is the opposite to a process in which the first sensing device 16 is turned on/off.

Please replace the paragraph starting on page 8, line 15 to read as follows:

The tact switch 74 is connected to the speaker 18 through the circuit board of the first sensing device 16. Reference numeral 74a denotes a button provided on the tact switch 74 and contacting the foreign material. First and second power supply lines 76a and 76b are connected to the tact switch 74. Power is supplied to the tact switch 74 through the first and second power supply lines 76a and 76b. When the button 74a is pressed, current flowing on flows via the tact switch 74 is set to flow to generate an alarm. To the contrary, when the button 74a is not pressed, the current flowing current via the tact switch 74 may be cut off.
